

LodeStone Supports More Carriers

The addition of Thomas Cook and Jet2 expands the list of airlines certified on LodeStone.

The list of airlines certified on LodeStone has recently been expanded with the addition of support for Thomas Cook and Jet2. Operating from Manchester International Airport, using fleets consisting of Boeing 757, Airbus A320 and A330 aircraft, and checked in on L-DCS, these two airlines now benefit from the full automation offered by Damarel's software solutions.

With other major low-cost carriers such as First Choice Airways already operational, LodeStone now accounts for a significant proportion of all charter Weight and Balance performed at MAN.
