

Aura - Common Use Platform for Regional Airports

Aura delivers a robust, scalable Common Use solution for small and medium sized regional airports. Aura is the most cost-effective way of increasing terminal capacity and improving automated passenger processing available.

Damarel has been helping airports maximise their potential for over 25 years. By implementing Aura, dedicated airline check-in and gate facilities are replaced with a network of common shared equipment, enabling higher utilisation and simpler scheduling.

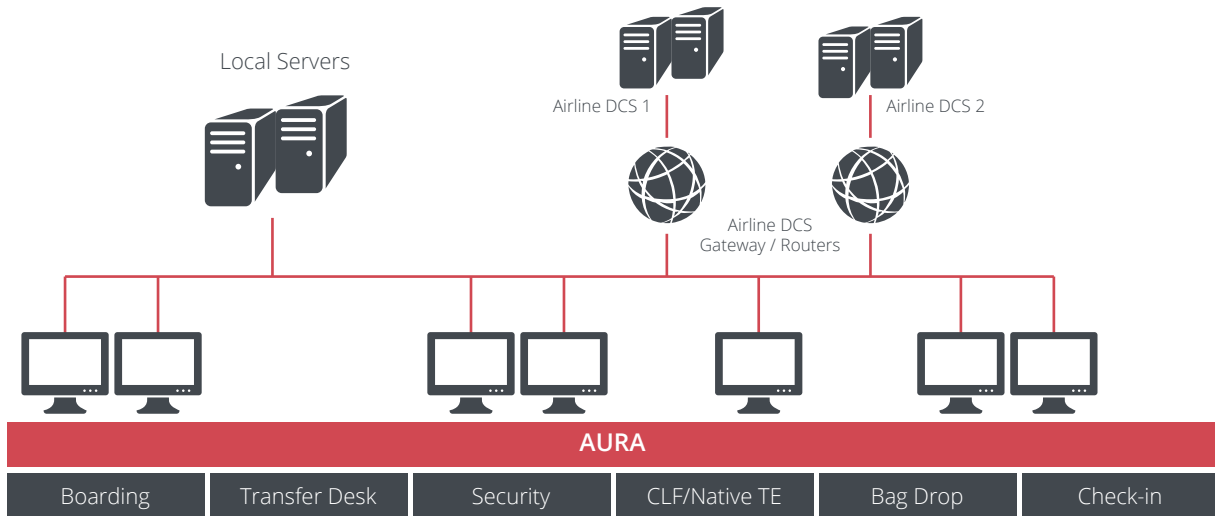

Benefits

- Zero Integration Platform (ZIP) model delivers an affordable alternative to expensive CUTE/CUPPS networks
- Fully hosted (SaaS) solution simplifies implementation and dramatically reduces costs
- Increased airport revenues through system leasing to airlines and ground handlers
- Low lifetime and support costs with flexible financing
- Secure, scalable platform that grows with your airport

By keeping support costs low, simplifying system management and utilising commodity components, Aura is THE cost effective solution for shared use of passenger handling facilities.

Many clients use Damarel to provide turn-key automation, pairing Aura with our class-leading passenger and flight handling solutions to provide complete, fully integrated airport automation.

Features

- Collects all the information required for accurate re-charging and Business Intelligence
 - Number of flights
 - Number of passengers
 - Documents produced (boarding passes, bag tags)
 - Desk utilisation
- For new airlines, simply connect your host, configure and set up security
- Enables the use of low-cost equipment – thin client workstations, GPPs
- Support for full range of Damarel's class-leading passenger and ground handling systems
- Simplified integration and certification for airline applications
- Multiple layers of security and access
