

# Babel Common Language Facility

Babel is the most flexible, powerful and widely supported Graphical User Interface for airline DCS passenger check-in available today. With support for over **50 airlines** on a huge variety of systems, Babel provides a simple Common Language Facility that replaces traditional cryptic green screen emulators with a Windows® interface that is effortless to use.

Whether you need a GUI to simplify your operations, or a CLF to enable cross-training over multiple airline systems, Babel provides the tools to empower your agents.

## Benefits

- Easy to use and intuitive Graphical User Interface
- Reduces training requirements and increases staff flexibility
- Makes cross training agents easy and greatly simplifies rostering problems
- Speeds up check-in and bag drop times and drastically reduces agent mistakes
- Certified for use on all the major Common Use platforms, including SITA and ARINC
- Babel allows the user to tailor the solution to their exact requirements

By guiding the check-in agent through the common tasks with simple menus, buttons and displays, Babel reduces errors, speeds up check-in and allows agents to concentrate on delivering a superior customer service. Training costs are drastically reduced!

## Features

- **Simple key strokes** give access to **major functions**
- Multiple copies of Babel give access to **many different host systems simultaneously**
- Supports all **modern peripheral devices**
- **Easy document printing** and includes **on-demand bag tags**
- Built-in support for **MATIP** and **Direct IP connections**
- Supports **native airline DCS entry** for experienced agents
- Installed in over **150 airports worldwide**
