

# FiNDnet Services Electronic Service Recording

Ensuring that **all** service provision is accurately recorded and presented for billing in a timely manner can be a challenge in a large or multi-station operational environment.

FiNDnet Services provides a secure mechanism for immediately recording all ground handling services as they are provided. By electronically recording all under- and over-wing services you can minimise revenue loss, remove mailing costs and enable next day billing.

The FiNDnet Services desktop and ship-side mobile entry facilities capture all of the details required for next day billing, with the provision of full backing material.

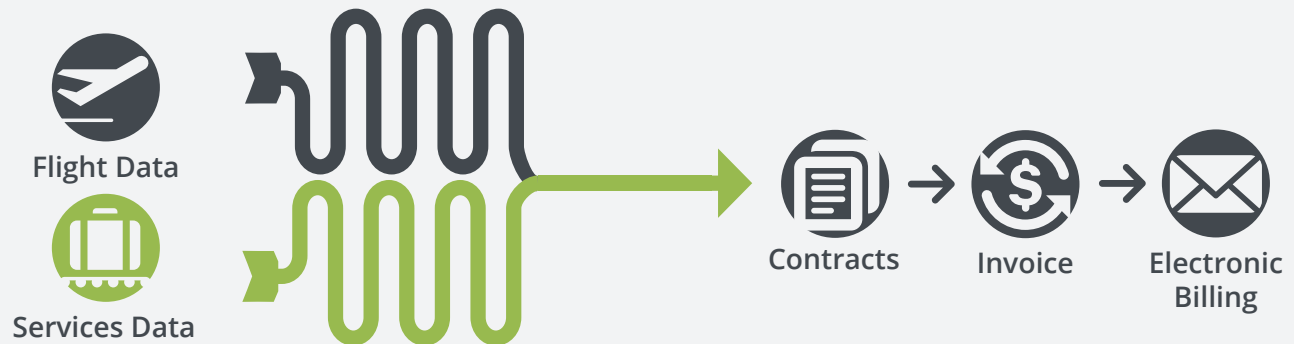

## Benefits

- Reduce paperwork, shipping costs and the billing overheads of processing
- Enable next day billing with full backing material
- Optional ship-side recording via FiNDnet Mobile for fully paperless operation
- Analyse service utilisation via on-station service provision reporting
- Capture all chargeable services for increased revenues

There is a common drive across the industry to reduce paperwork, improve processes and generally 'go green' in this modern age. FiNDnet Services sits at the sharp end of this initiative, enabling service provision to be captured electronically as early in the process as possible.

When fully integrated into the FiNDnet Suite, captured services are seamlessly transferred and tracked through the billing process and onto invoice backup material which can then be sent electronically along with the invoice.

## Features

- **Fully scalable** and extendable for the **introduction of new services**
- Multi-station architecture for the **harmonisation of details and processes**
- **Seamless integration** with FiNDnet Operations, Mobile and Billing, for streamlined operations
- Simple central administration
- Ability to tailor service **screens according to department**
- Pre- and Post-operation **printed service tickets**
- Optional ship-side **PDA recording with electronic signature capture**
- Automated **electronic transfer to FiNDnet Billing**
