

Embark Passenger Boarding System

Embark is the world's foremost airline passenger boarding system, providing rapid and secure gate handling to airlines around the globe. Embark will improve your entire gate operation - enhancing security, removing manual checks and speeding up passenger processing.

Easy to use, Embark presents a simple GUI to the agent regardless of the airline DCS. Training time is reduced to a matter of minutes. With our class-leading reconciliation technology you can also be sure that the airline DCS is completely up-to-date.

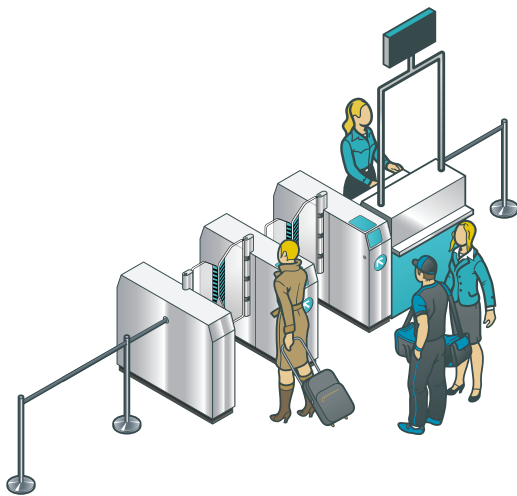

Benefits

- Instant Board/No Board decisions, checking API and Selectee data
- Significantly cuts boarding time and improves on-time departures
- Reduces staffing levels and increases flexibility
- Fully supports the latest eGates for passenger self-service
- Better security and accuracy – improves API compliance
- No additional hardware required - low deployment and lifetime costs
- Mobile version available - EMBARKmobile
- Unaffected by DCS outages

Damarel has been providing automated boarding solutions for more than 20 years and Embark is the latest evolution of our core product.

With installations at over 200 airports worldwide, supporting over 50 carriers and processing hundreds of millions of passengers every year, you can be sure that Embark is the right solution for you.
