

FiNDnet Mobile

Mobile workforce solutions

FiNDnet Mobile is a multi-purpose mobile workforce solution enabling process improvement, improved performance and increased resource utilisation through better communication.

Providing targeted facilities for Turnaround Management along with integrated capabilities for Service Recording and Task Communication, FiNDnet Mobile spearheads the operation, pushing out the actions required, enabling progress monitoring from the operations centre and gathering the details needed for downstream billing and KPI reporting.

Fully and seamlessly integrated with other components of the FiNDnet Suite, FiNDnet mobile delivers what you need, where you need it, across the operation.

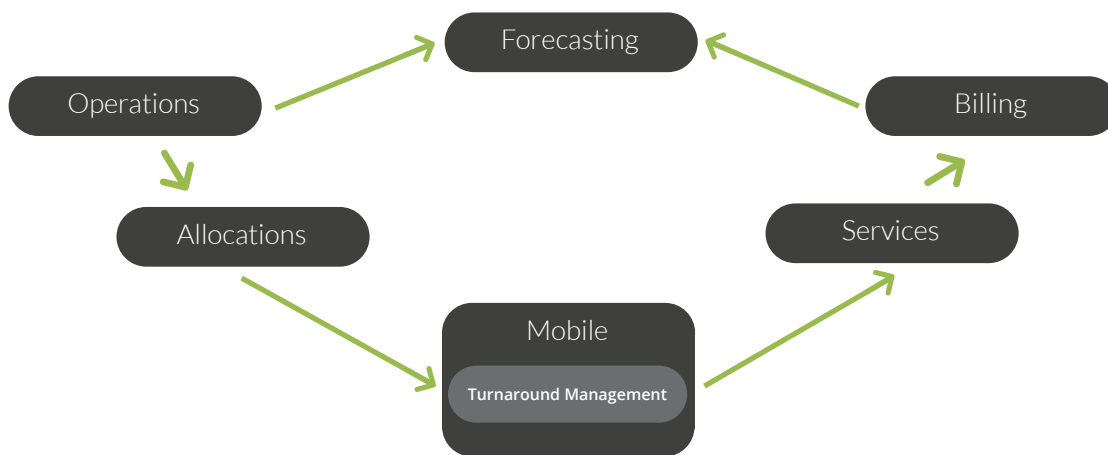

Benefits

- Improve visibility of the turnaround and enhance on-time performance
- Remove paperwork, reduce costs and enable rapid billing
- Meet key SLA markers and have ready access to KPI reports
- Improve staff utilisation with mobile task communication and reduced shuttle time
- Deliver information to the team and trigger messages from the ramp

Turnaround management facilities allow the turn to be broken down into key events based on each carrier's SLA. Proactive guidance and monitoring both on the PDA and in the control centre provide full visibility of progress, allowing for early corrective action - enabling SLAs to be met and facilitating full KPI reporting.

Enabling direct communication of both tasks and progress between FiNDnet Allocations in the ramp and towing sections and their respective teams and drivers completes the loop. Mobile communication provides immediate feedback and improved visibility for better operational awareness and staff utilisation.

Features

- **Device independent** ruggedised mobile PDA platform
- Intuitive, integrated UI for **easy interaction**
- **Simple** tap-through **turnaround flow**, with step out to additional facilities
- **Point and click** service recording, with provision overview and **on screen signature**
- **Base to agent messaging** plus broadcast facility
- My Tasks list for **task assignments**, acceptance **and progression**
- Live **WIFI and 3G** communications with **local activity sync** for blackouts
